

Major in Geographic Information Science

B.S. or B.A.

GIS IS A SCIENCE, TECHNOLOGY, ENGINEERING, AND MATH (STEM) MAJOR!

WHAT IS GIS?

Geographic Information Science (GIScience) is the scientific discipline that conducts spatial analysis to examine economic, environmental, physical, and social phenomena. GIS overlaps with and draws from many research fields such as computer science, statistics, mathematics, and psychology, and contributes to progress in those fields. GIS is interdisciplinary and supports research in many academic disciplines. Courses in GIS enable students to develop capability in spatial thinking and gather in-depth knowledge in geospatial technology.

POTENTIAL CAREER PATHS

The U.S. Department of Labor recognizes **geotechnology** as one of the three most progressive professions today, alongside nanotechnology and biotechnology. Graduates with GIS are in extremely high demand. Potential career paths include:

- Asset Management
- Banking & Insurance
